

In re Patent Application of:
MARK J. ANTOINE ET AL.
Serial No. **10/076,080**
Filing Date: **February 14, 2002**

FIGS. 2A, 2B, 2C, 2D, and 2E combine to provide a block diagram illustrating an alternate embodiment of the multiswitch and triplexer of the present invention;

FIGS. 3A, 3B, and 3C combine to provide a block diagram of an alternate embodiment of the system of FIGS. 2A, 2B, 2C, 2D, and 2E in keeping with the teachings of the present invention;

Please replace the paragraph beginning on page ten (10), line one (1) of the specification with the following rewritten paragraph:

With reference now to FIGS. 2A, 2B, 2C, 2D, and 2E as combined and referred to herein after as FIG. 2, one preferred embodiment of the system **10** includes input ports **42** providing six satellite port connections **46** and a cable T.V. port feed connection **48** which as herein provided by way of example are routed through output ports **44** to as many as eight receivers **20**. Cascaded antenna outputs **50** are provided after initial antenna signal processing within the multiswitch **26** for providing a feed to other multiswitch antenna ports thus allowing a cascading of the antenna ports to feed multiple receivers. As earlier described with reference to FIGS. 1 and 2, the multiswitch **26** interfaces to the triplexer **28**. Alternate triplexer embodiments will include a "high end" triplexer **28h** or a "low end" triplexer **28l** as illustrated with reference to the system of FIGS. 3A, 3B, and 3C combined and herein after referred to as FIG. 3 and to the triplexer diagrams of FIGS. 4A and 4B. The "high end" triplexer **28h**, so named for its added features over a "low end" triplexer **28l**,
